ABOUT ME

UX/UI Designer | Software Developer | Full Stack MERN Developer

Creative UX/UI Designer & Full-Stack Developer with 2 years experience in designing intuitive, user-friendly digital experiences. Skilled in transforming user research into functional wireframes, prototypes, and polished interfaces. Strong background in front-end and back-end development (MERN stack), allowing seamless collaboration with developers. Passionate about building scalable solutions that balance usability, aesthetics, and performance.

Education & Training

PLP Academy – Full-Stack MERN Development Scholarship Graduate

- Hands-on projects in web design and web development.
- UI/UX design training for responsive apps and websites.
- Mastered MERN stack (MongoDB, Express.js, React, Node.js).

Core Skills

- **Design & UX Tools:** Figma, Adobe XD, Sketch, Photoshop, Illustrator.
- **UX/UI Skills:** Wireframing, Prototyping, User Research, User Flows, Journey Mapping, Usability Testing.
- **Collaboration Tools:** UI/UX Design, Figma, Adobe XD, Responsive Web Design.

Professional Experience

- Designed and developed responsive websites with a focus on clean, modern UI and intuitive navigation.
- Conducted user research and usability testing, refining products based on user feedback.
- UI/UX Design: Designed apps and websites prioritizing user experience and clean interfaces.
- Created interactive prototypes in Figma for client presentations.
- Collaborated with developers to ensure design-to-code accuracy.

Project

- QueueCare System (Full MERN Project)
Developed a responsive platform to reduce clinic queues, handling both user experience design and front-end implementation.
